## **Amendments to the Abstract**

Please amend the Abstract to read.

-- A method for generating an on-screen menu comprising menu buttons (BG81,...,BG86') and other menu items, e.g. help text, is characterized in that comprises one or more groups of menu buttons or menu items are defined, wherein a group comprises one or more menu buttons or menu items and has associated a defined area on the screen. A state is assigned to a button, the state being "enabled" or "disabled", wherein only an enabled button or item may be displayed, and wherein within a group not more than one button or item may be enabled. The state of a button can be changed by commands associated with other buttons.
